

Jabra®

Jabra®

THE JABRA UNIFIED COMMUNICATIONS EXPERIENCE

Working hand in hand with the Cisco's Developer Network program, GN Netcom has developed a wide range of Jabra headsets that are integrated with Cisco Unified IP Phones and Cisco Unified Communication Clients. Jabra headsets support remote call control enabling users to answer and end calls, adjust the volume or mute the microphone directly from the headset up to 150 meters away from their desks! Cisco IP Communicator release 7.0(3) incorporates a Plug and Play driver for Jabra USB headsets and phones. The end result is an enhanced user experience: easy to install, simple to use and comfortable to wear plus exceptional audio performance = more productive and satisfied employees.

FREE YOUR HANDS

A Jabra headset frees your employees' hands so they can get up and stretch their body or look up files on their computer or in a

folder while talking on the phone! The enhanced flexibility and the ability to multitask will not only make your employees feel liberated, but also make them far more productive. If your employees have wireless headsets they can even walk about. Pick up a file from a colleague. Grab a printout from the copier and still be on the phone with a customer.

AWARD-WINNING DESIGN

Jabra's headsets reflect professional styling with modern design combined with ergonomic, lightweight comfort. So your employees will not only look good, they will feel good, too! Your employees will also appreciate the fact that they'll experience less muscle strain throughout the day. Which means happy and more productive employees.

ABOUT GN NETCOM

Through its Jabra brand, GN Netcom is a world leader in innovative headset solutions. With around 900 employees and sales offices around the world, GN Netcom develops, manufactures and markets a broad range of wireless headsets and speakerphones for mobile users and both wireless and corded headsets for contact centre and office-based users. GN Netcom's business activities also include its original equipment manufacturing (OEM) business. GN Netcom is a subsidiary of GN Store Nord A/S.

VOIP WITH SUPERB CALL CLARITY

Cisco IP Communicator softphone release 7.0(3) incorporates a 'Plug and Play' driver for Jabra USB headsets and phones. The Jabra USB headsets and phones are simple to install and easy to use. They also feature wideband audio for exceptional sound clarity and remote call control for answering/ending calls and adjusting volume. Visit www.jabra.com/cisco for further details.

CALL CONTROL AT YOUR FINGERTIPS

With a wireless Jabra headset employees can answer and end calls up to 450 feet away from their PC or desk phone! Jabra headsets for Cisco IP Communicator have integrated buttons for answering and hanging up a call and adjusting the volume. Simply press the dedicated "Hook switch" button to answer a call. To end a call, press the same button again.

SEAMLESS INTEGRATION

The seamless integration of software and Jabra headsets provides users with superb call clarity and a hands-free, work experience. There are no drivers to install. Just plug the headset into the USB port and Cisco IP Communicator will recognize the headset.

TRUE WIDEBAND SOUND

True wideband sound secures optimum call clarity and gives a true person-to-person experience. Moreover, Jabra headsets feature PeakStop™ technology, which protects users by eliminating sudden loud noises above 118 dB SPL.

* These products have been certified by Cisco.
** Range varies according to the environment in which the headset is used
*** Not all versions feature all 3 wearing styles
